

7% Solution.

HOPF WEISSER BOCK

Sometimes we want a beer with a robust alcohol content like say, 8% ABV. Other times we want a gentler 6% to coast through an evening.

The Hopf Weisser Bock has captured the Goldilocks Effect with the 7% solution, just right for a blissful experience that is neither too heavy nor too light.

A beer that transports traditionally strong wheat beer with a beautiful red and gold color. It's our richest tasting beer with a slightly sweeter finish and complexity that the sophisticated beer drinker finds irresistible. It tastes a little too good and it goes down a little too easily.

What a solution.
